## **Regency Glass Ltd Manufacturer of Insulated Glass Units**

### **Information Regarding Dangerous Substances**

Reference, clause 4.6 of EN 14351-1: 2006+A1:2010

Insulating glass units manufactured and supplied by Regency Glass Ltd for use in the fabrication of windows and doors are regarded as non-toxic. All components used in the manufacturing process are chemically inert when present in the final product – insulating glass units. Insulating Glass Units provided by Regency Glass Ltd are not considered harmful to health or to the environment and are free from emissions when in normal use.

Regency Glass Ltd is a responsible supplier who operates a comprehensive Occupational Health & Safety Management System (inclusive of COSHH regulation 2002, amendment 2005) and is accredited to EN14001:2004 Environmental Management Systems.

All raw materials used in the manufacture of insulating glass units at Regency Glass Ltd are subject to the above regulations. Manufacturing waste is recycled where possible or disposed of in accordance with product waste recommendations or relevant guidelines.

Thermally Insulated Glass Units manufactured by Regency Glass Ltd supplied for the use in the fabrication of windows and doors contribute to the reduction of energy use and CO<sub>2</sub> emissions.

Copyright of the information supplied within this statement is the property of Regency Glass Ltd and all rights reserved. This document may not be copied or used for any other purpose than for which it was supplied without the prior consent of Regency Glass Ltd.
