Seasons

SMARTGLASS™ ULTIMATEBLUE

REDUCES HEAT LOSS

U-Value

1.0

U-Value = Measures heat loss through the unit in winter months. **The lower U-Value, the warmer in winter the room will be.**

HEAT REFLECTION

G-Value

20%

G-Value = Shows the percentage of the sun's heat able to pass through the unit. **A G-value of 20% means that 80% of the sun's heat is reflected back or absorbed by the glass, reducing heat build-up in the summer months**

REDUCES GLARE

Light Transmission

27%

Light transmittance = Percentage of visible light able to pass through the unit. **The lower the light transmittance, the lower the glare within the room.**

True Self Clean

Yes

Self Clean coating reduces the requirement of manual cleaning, as it enables water to run off the glass taking most dirt and grime with it.

Reflecting 80% of the sun's rays, choose

SMARTGLASS™ ULTIMATEBLUE

for totally unsurpassed solar control and thermal performance.
